TJ CUSTOM LIGHT MOUNT BRACKET

MODEL #TJ -LED LMB

Jeep Wrangler TJ / 1997 to 2006

Brackets are adjustable for LED Lights with Mounting Hole center to center dimensions of 21 7/8" to 28 5/8". Can also be used with small LED Cube Lights as shown in picture # 4.

Installation Instructions

1. Remove the two Bumper/Tow Hook Bolts on both sides as shown in picture #1.
2. Loosely install the Light Mount Brackets with the Light Mount holes facing the center of the Jeep as shown in picture #3.
3. Adjust the distance between the Brackets to match your LED Light Bar and tighten Bumper/ Tow Hook bolts.**
4. Install LED Light Bar.

**Depending upon the size of your Light Bar, the Tow Hooks can be swapped to the opposite side ensuring that the Light does not block the use of the Hook.
