Before You Begin Installation:

Congratulations on your purchase of the Quadratec Rock Guards for your Jeep® Wrangler.

Due to the length and bulk of these guards, we strongly suggest you get the help of a friend for steps that involve lifting, locating or holding the rocker guards during installation.

When unpacking, check to make sure all parts are included and not damaged due to shipping. If any part is missing or broken, please call Customer Service at 800-745-6037 as soon as possible.

Thank you again for your purchase and let's start the installation process.

NOTICE

As you unpack your rocker guards, be careful not to scratch the finish with a knife or razor. We suggest placing the unpacked guards back into the original box so it does not get scratched before the installation begins. It is highly recommended that a second person assist with the installation of these rocker guards.

Product Care and Maintenance:

Your Rock Guards have been designed and manufactured to provide years of use. However, like any product, general maintenance is required to keep them looking new.

Because the guards are located on the underside of the vehicle, they are

subject to potential rock chips and other debris potentially causing portions of the paint to chip off. For touch ups, we recommend using a textured black spray paint sprayed on a piece of cardboard and cotton swab to gently fill in these chips. This will prevent any rust from forming.
